WANGSTON CMK-65 MACHINE SERIES

COLLINEAR ANGLE STRAIGHT EDGE STRIP BLADES CLASS: CL-A

COLLINEAR ANGLE STRIP BLADES

Sharp edge is ground to a flat collinear angle.

This class of blade was designed to allow multiple conductor wire to be processed with one set of blades. This class is also used in many rotary strip models. The main advantage of this class is the ability to process many different wire gauges with the same blades, (dependent upon machine function).

There will always be a percentage of insulation tear with this class of blade. This class does not work well with thin wall insulation.
